# Technical Tip -
Importance of Rinsing

Would you jump out of the shower without rinsing or put soap on your car and not rinse? If you are not properly maintaining the rinse water in your paint or powder coating pretreatment system, your product quality is suffering. It is absolutely critical to maintain your rinses so the quality of your coating is maximized.

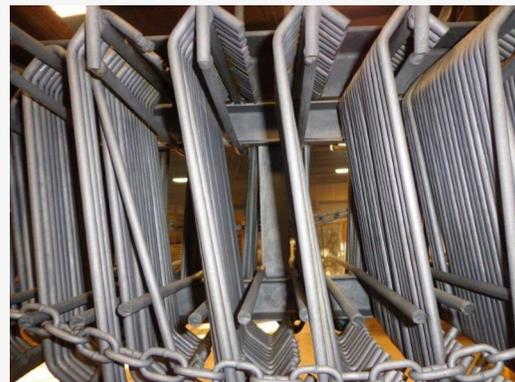

Dried down Rinse Water 750 TDS on top and DI Water on bottom

Technical Tip -
Increase Your Paint Line Efficiency

Inefficiencies Associated with Excessive Film Build on Hooks and Racks
There are several consequences of excessive film build on hooks and racks.

Example of clean fixtures serviced by AFR

- Poor part grounding.
- Increased paint and powder paint consumption.
- Increased labor due to rejects and touchup or repaints.

- Rejects due to imperfections with either light paints or inconsistent film build.

Safety Alert -
Protecting Workers from Heat Stress

Heat Illness

Exposure to heat can cause illness and death. The most serious heat illness is heat stroke. Other heat illnesses, such as heat exhaustion, heat cramps and heat rash, should also be avoided. There are precautions we should any time temperatures are high and the job involves physical work.

Summer is here.
We need to be aware of the dangers.
