

Analytical Capabilities and Equipment

DuBois has a state of the art customer support laboratory where we simulate your current process and examine the results to make the best possible recommendations. Our analytical laboratory runs thousands of tests on solutions and parts from customers each year. We are equipped to run the most valuable and commonly requested tests associated with optimizing and troubleshooting processes.

DuBois offers the following customer support analysis:

- Soil identification
- Systems' parameter measurements
- Substrate evaluation
- Residues and scales
- Crossover from lab to production to field support
- Water quality in, during, and out of system

Analytical support equipment for soil identification & elemental analysis include:

- Fourier Transfer Infrared (FTIR)
- X-Ray Fluorescence (XRF)
- Inductively Coupled Plasma (ICP)
- Gas and Ion Chromatography
- Stereo Optical Microscope
